I have an old GM 230 engine and transmission from a mid-60's era half ton truck. I'd like to use the engine to power my sawmill my hooking the prop shaft right to the mandrel. The only problem with my plan is maintaining the speed; for a headsaw to run true you have to remain a fairly constant RPM.

### **stationary engine | eBay**

A stationary engine is an engine whose framework does not move. They are used to drive immobile equipment, such as pumps, generators, mills or factory machinery. The term usually refers to large immobile reciprocating engines, principally stationary steam engines and, to some extent, stationary internal combustion engines.
